

AMENDMENTS TO THE CLAIMS

The listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims

Claims 1-8 (Cancelled)

9. (Previously Presented) An image formation apparatus comprising:
 - an input unit entering image data,
 - a printer unit printing image data,
 - a memory storing trigger information to initiate execution of a control operation and said control operation in correspondence,
 - a detector detecting additional information including said trigger information from said image data, and
 - a controller responsive to detection of said trigger information to execute said control operation corresponding to said trigger information stored in said memory,
 - wherein said control operation includes a transmission operation transmitting print information related to printing of said image data to a destination.
10. (Original) The image formation apparatus according to claim 9, further comprising an operation unit setting said trigger information and said control operation in correspondence.

11. (Original) The image formation apparatus according to claim 9, wherein said print information includes information indicating an event of printing said image data.

12. (Original) The image formation apparatus according to claim 9, wherein said print information includes a print condition in printing said image data.

13. (Original) The image formation apparatus according to claim 9, wherein said control operation includes a print operation printing out said image data according to a predetermined print condition.

14. (Original) The image formation apparatus according to claim 9, wherein said control operation includes an image processing operation processing said image data according to a predetermined image processing condition.

15. (Original) The image formation apparatus according to claim 9, wherein said transmission operation includes an operation of transmitting said print information to a destination specified by an electronic mail address through electronic mail.

Claim 16 (Cancelled)

17. (Original) An image recording apparatus comprising:
an input unit entering image data,
a record unit recording input image data on a recording medium,

a detector detecting additional information from said image data, said additional information including trigger information to initiate execution of a predetermined control operation, and

a controller executing said predetermined control operation in response to detection of said trigger information,

wherein said predetermined control operation includes a transmission operation transmitting information related to recording of said image data to a destination.

Claims 18-19 (Cancelled)
